### 1651 & 1654 nm

 1742.0 nm
 1854 & 1877 nn
 2004.0 nm
 2330 & 2334 nn
 3240 & 3270 nn
3345 & 3375 nn
 4524 & 4534 nn
5184 & 5263 nn

# **TOP Wavelengths** DFB: 1651 nm & 1654 nm

Schematic DFB

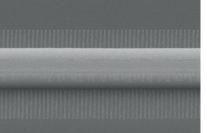

with spectrum

λ

nanoplus Distributed Feedback Lasers (DFB) are specifically designed for high-precision gas detection using tunable diode laser absorption spectroscopy (TDLAS). Our devices operate reliably in more than 30,000 installations worldwide. For more than 20 years nanoplus has set the standard for DFB laser technology and is the only manufacturer routinely providing DFB lasers at any wavelength.

### **Key features:**

- MONOMODE
- CONTINUOUS WAVE
- **ROOM TEMPERATURE**
- MODE HOP FREE TUNING

signal to noise ratio against crossinterference. Overgrowth-free DFB device proces-A narrow linewidth below 3 MHz guarantees ultra-precise scanning of the absorption line feature. The **high output power** of **several mW** yields a stronger signal and increases your

Fast and wide wavelength

measurement precision.

tuning is required for in situ systems. Most customers use a scan rate of 10 kHz and benefit from our very large tuning coefficient.

"Do not change your ideas, let us deliver a laser that fits your application."

Any custom wavelength is possible: You tell us what you need and we deliver it. With our patented DFB technology we design any wavelength between 760 nm and 14 µm.

Our excellent spectral purity is characterized by a large side mode suppression ratio (SMSR) of > 35 dB, giving your system a low

We offer various packaging options, e.g. several free space housings including TEC and NTC, fiber coupling, collimation and custom designs. What do you require?

If you require custom specifications, please contact us. Nearly 80 % of our devices are more or less customer-specific. As nanoplus is a fully vertically integrated company, we control the entire process chain from design to packaging. Both nanoplus production facilities are based in Germany. To guarantee consistent product quality we apply a strict and ISO certified quality management system at all levels.

Our sales and R&D teams have long-standing experience in developing lasers. They will advise you in your design and realization phase as well as after-sales: We make market leaders!

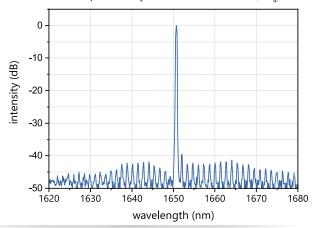

TO5. TO56 and fiber coupled butterfly package

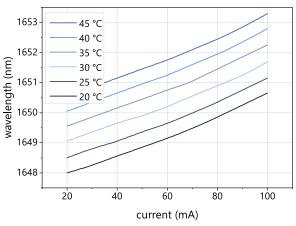

# Superior Specifications: 1651 nm & 1654 nm

This data sheet reports performance data of a **sample nanoplus DFB laser at 1651 nm with enhanced specifications**. They are equally valid for 1654 nm. Standard specifications are available at: http://nanoplus-usa.com/products/dfb-laser. These lasers are particularly suitable for methane (CH<sub>4</sub>) detection.

Typical room temperature cw spectrum of a nanoplus DFB laser at 1651 nm

electro-optical characteristics	symbol	unit	min.	typ	max.
operating wavelength (at $T_{_{\mathrm{op}}},I_{_{\mathrm{op}}})$	$\lambda_{_{op}}$	nm		1651	
optical output power (at $\lambda_{_{op}})$	P <sub>op</sub>	mW		8	
operating current	I <sub>op</sub>	mA		70	
operating voltage	$V_{op}$	V		2	
threshold current	I <sub>th</sub>	mA	10	20	30
side mode suppression ratio	SMSR	dB		> 35	
current tuning coefficient	C,	nm / mA	0.008	0.012	0.015
temperature tuning coefficient	C <sub>T</sub>	nm / K	0.10	0.11	0.14
operating chip temperature	T <sub>op</sub>	°C	+20	+25	+45
operating case temperature*	T <sub>c</sub>	°C	-20	+25	+55
storage temperature*	Τ <sub>s</sub>	°C	-40	+20	+80

## laser packaging options

TO5 with TEC and NTC, black cap, AR coated window

TO56 without TEC or NTC, sealed, window

c-mount without TEC or NTC

butterfly package with TEC and NTC, SM or PM fiber, FC/APC connector

chip on carrier without TEC, with NTC

Technical drawings & accessories are available at: https://www.nanoplus-usa.com/products/packaging
