## **DFB Interband Cascade Lasers** (ICL) 4600 nm - 5300 nm

#### WAVELENGTH

760–830 nm
830–920 nm
920–1100 nm
1100–1300 nm
1300–1650 nm
1650–1850 nm
1850–2200 nm
2200–2600 nm

- 2600–2900 nm

2800–4000 nm

4000–4600 nm

4600–5300 nm

5300–5800 nm

5800–6500 nm

6000–14000 nm

SIERED COMP SUISO 9001 14001

nanoplus Distributed Feedback Lasers (**DFB**) are specifically designed for high-precision gas detection using tunable diode laser absorption spectroscopy (**TDLAS**). Our devices operate **reliably** in more than 50,000 installations worldwide. For 25 years nanoplus has set the standard for DFB laser technology and is the only manufacturer routinely providing DFB lasers at **any wavelength**.

### **Key features:**

- MONOMODE
- CONTINUOUS WAVE
- ROOM TEMPERATURE
- MODE HOP FREE TUNING

Overgrowth-free DFB device processing

Any **custom wavelength** is possible: You tell us what you need and we deliver it. With our patented DFB technology we design any wavelength **between 760 nm and 14 µm.** 

Our excellent **spectral purity** is characterized by a large side mode suppression ratio **(SMSR)** of > **35 dB**, giving your system a low signal to noise ratio against crossinterference.

A **narrow linewidth below 3 MHz** guarantees ultra-precise scanning of the absorption line feature. The **high output power** of **several mW** yields a stronger signal and increases your measurement precision.

#### Fast and wide wavelength tuning is required for in situ systems. Most customers use a scan rate of 10 kHz and benefit from our very large tuning

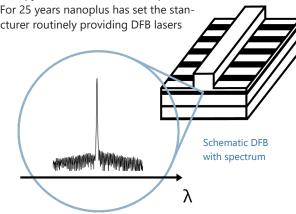

coefficient.

"Do not change your ideas, let us deliver a laser that fits your application."

We offer **various packaging options**, e.g. several free space housings including TEC and NTC, fiber coupling, **collimation** and **custom designs**. What do you require?

If you require **custom specifications**, please contact us. Nearly 80 % of our devices are more or less customer-specific. As nanoplus is a **fully vertically integrated company**, we control the entire process chain from design to packaging. Both nanoplus production facilities are based in **Germany**. To guarantee consistent product quality we apply a strict and **ISO certified quality management system** at all levels.

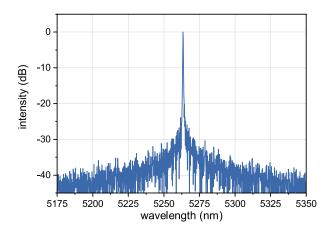

Our sales and R&D teams have long-standing experience in developing lasers. They will advise you in your design and realization phase as well as after-sales: **We make market leaders!**  TO5, TO56 and fiber coupled butterfly package

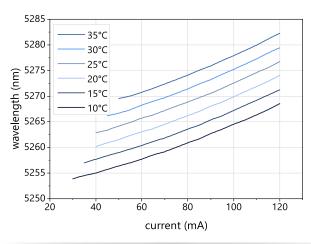

# Typical Specifications: 4600 nm - 5300 nm

This data sheet reports performance data of a **sample DFB ICL at 5263 nm**, which is representative for the entire wavelength range. We offer enhanced specifications for 5184nm and 5263 nm. Please refer to our <u>TOP Wavelengths</u> for further details: https://nanoplus-usa.com/products/dfb-laser.

Typical room temperature cw spectrum of a nanoplus DFB laser at 5263 nm

Typical mode hop free tuning of a nanoplus DFB laser at 5263 nm by current and temperature

electro-optical characteristics	symbol	unit	min.	typ	max.
operating wavelength (at $T_{_{op'}}$ I $_{_{op}}$ )	$\lambda_{_{op}}$	nm		Please specify to 0.1 nm.	
optical output power (at $\lambda_{_{op}})$	$P_{op}$	mW		3	
operating current	l <sub>op</sub>	mA			120
operating voltage	$V_{op}$	V		5	
threshold current	I <sub>th</sub>	mA	30	40	70
side mode suppression ratio	SMSR	dB		> 35	
current tuning coefficient	C,	nm / mA		0.14	
temperature tuning coefficient	C <sub>T</sub>	nm / K		0.48	
operating chip temperature	T <sub>op</sub>	°C	+10	+20	+50
operating case temperature*	T <sub>c</sub>	°C	-20	+25	+50
storage temperature*	Τ <sub>s</sub>	°C	-30	+20	+70

\* non-condensing

### laser packaging options

TO66 with TEC and NTC, sealed, AR coated window

Other packaging options may be discussed on request.
